Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 January 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.

DETAILED ACTION

Claim Objections

1. Claims 4-7 and 12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to the other claims in the alternative only, and cannot not depend on any other multiple-dependent claims. See MPEP § 608.01(n). Accordingly, the claims 4-7 and 12 are not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

-Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 13 and 14 provides for the use of an automatic guided transport system, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. See *Ex parte Erlich*, 3 USPQ2d 1011 (Bd. Pat. App. & Inter. 1986), and MPEP 2173.05 (q).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Art Unit: 3737

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

-Claims 13 and 14 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

-Claims 1, 2, 8, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Damadian et al. (US 6,414,490 B1).

Damadian teaches an MR-assisted surgical system, comprising the following structures:

- Treatment support, in this case, a patient support for imaging and treatment.
- Automatically guided transport system. (Column 5, lines 15-20)

-Wherein the transportation means comprises a movable vehicle. (Column 5, lines 58-63)

-Claims 1, 2, 8, 10, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Acker et al (US 6,128,522).

Acker teaches an MR guided therapeutic unit, comprising an automatic-feedback portable MRI chassis positioner with optoelectronic encoders to provide signals indicating the positions of the movable elements in the positioner.

Allowable Subject Matter

5. Claims 3 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Damadian et al. (US 6,404,202 B1) teaches an MR imaging device and an apparatus for treatment support, in this case, a patient support for imaging and treatment, comprising automatically guided transport system. (Column 5, lines 18-25), wherein the transportation means comprises a movable vehicle. (Column 5, lines 58-63)

-Taylor et al. (US 6,231,526 B1, US 5,976,156, US 5,950,629, US 5,402,801, US 5,445,166, and US 5,695,500) teaches a computer-operated surgical equipment guide device, comprising the use of LED emitters and sensors to automatically guide robotic surgical device mounted on various tracks into position.
